PATENT  
Filed: February 19, 2004

1. (previously presented) A method for obtaining information based on a TV program, comprising:
  - displaying, with the program, closed captioning text;
  - causing primary words within the closed captioning text to appear differently in the closed captioning text than remaining secondary words;
  - permitting a user of a remote control device communicating with the TV to select at least one word to establish a selected word; and
  - if the selected word is a primary word, displaying a list of content related to the selected word.
2. (original) The method of Claim 1, wherein the list is displayed in a picture-in-picture (PIP) window on the TV.
3. (original) The method of Claim 1, wherein the list is displayed on a display of the remote control device.
4. (original) The method of Claim 1, wherein the selected word is a secondary word, and the method comprises displaying a dictionary definition of the selected word.
5. (original) The method of Claim 1, further comprising permitting a user to select at least one content on the list and displaying the content.

PATENT  
Filed: February 19, 2004

6. (original) The method of Claim 5, wherein the content is obtained from an audio/video data storage associated with the TV.

7. (original) The method of Claim 5, wherein the content is downloaded from at least one of: the Internet, and a transmitter head end, in response to the user selecting the content.

8. (original) The method of Claim 7, further comprising adding the content to a local data storage associated with the TV and correlating the content with other content related to the selected word.

9. (original) The method of Claim 7, further comprising billing the user for downloading the content.

10. (previously presented) A system for obtaining information using a TV closed caption display, comprising:

a TV receiving content from a source, the content including closed caption text;  
a remote control device configured for wireless communication with the TV; and  
a data structure accessible to a computer associated with at least one of: the source, and the TV, the computer retrieving from the data structure a list of content related to at least one word appearing in the closed caption text and selected by a user manipulating the remote control device, the word appearing within the closed caption text and being selected from the closed caption text by means of the remote control device.

PATENT  
Filed: February 19, 2004

11. (original) The system of Claim 10, wherein the list is displayed in a picture-in-picture (PIP) window on the TV.

12. (original) The system of Claim 10, wherein the list is displayed on a display of the remote control device.

13. (original) The system of Claim 10, wherein the user can select a word to cause the computer to transmit to the TV a dictionary definition of the word.

14. (original) The system of Claim 10, wherein the remote control device can be manipulated to select at least one content on the list for displaying the content.

15. (original) The system of Claim 14, wherein the content is obtained from an audio/video data storage associated with the TV, and the computer is in the TV.

16. (original) The system of Claim 14, wherein the content is downloaded from at least one of: the Internet, and a transmitter head end, in response to the user selecting the content.

17. (original) The system of Claim 16, wherein a processor associated with the TV adds the content to a local data storage associated with the TV and correlates the content with other content related to the selected word.

PATENT  
Filed: February 19, 2004

18. (previously presented) A system for retrieving content related to a TV program including closed caption text, comprising:

means for displaying the TV program with closed caption text;

means for allowing a user to select at least one word within the closed caption text by input device manipulation on the closed caption text; and

means for presenting a list of content associated with the word in response to the means for selecting.

19. (original) The system of Claim 18, wherein the list is displayed in a picture-in-picture (PIP) window on a TV.

20. (original) The system of Claim 18, wherein the list is displayed on a display of a remote control device.

21. (original) The system of Claim 18, wherein a user can select a word in the closed caption text to cause a computer to transmit to a TV a dictionary definition of the word.

22. (original) The system of Claim 18, further comprising means for permitting a user to select at least one content on the list and displaying the content.

PATENT  
Filed: February 19, 2004

23. (original) The system of Claim 22, wherein the content is obtained from an audio/video data storage associated with a TV.

24. (original) The system of Claim 22, wherein the content is downloaded from at least one of: the Internet, and a transmitter head end, in response to the user selecting the content.

25. (original) The system of Claim 24, wherein a processor associated with a TV adds the content to a local data storage associated with the TV and correlates the content with other content related to the selected word.

26. (canceled).

27. (new) A method for obtaining information based on TV programs, comprising:  
associating at least some of the programs with closed captioning text;  
receiving at least one query word from a user;  
using the closed captioning text, generating a list of programs in response to the query word;  
and  
returning the list to the user.
